

Nyumbani - Caring for Abandoned and Orphaned HIV+ Children in Kenya

For the past several years, Dr. Paul Perito's Philanthropic focus has been directed to the Nyumbani Children's Home.

The home was created as an active response to the rapidly rising number of HIV infected children, born in Africa every day. The home provides assistance, education and sanctuary for thousands of children each year and reflects a lifetime of effort by the visionary, Father Angelo D'Agostino, S.J., M.D.. Father D'Agostino passed away in 2006 and his work and mission live on each day in the community that he so meticulously developed. Dr. Perito works every day to help forward this important cause.

For more information about the Nyumbani Children's Home, or to give a donation, please see:
